

I've been testing a new method for the past 2 and half months and I'm happy to announce that it works like a charm.

So here is the story...

I've been an affiliate with Adult Friend Finder since 2006, but I really did not promote them until about 3 months ago. Why? Simply because I had not figured out a way of easily making money with them, but I have figured that out now and it's been making me good money for the past 10 weeks.

So how does this work? Easy... Here is how I do it:

Using the [Adult Friend Finder PPC Program](#) pays you an estimated U\$5.00 per 1000 unique clicks you send them...

And using [Juicy Ads](#) you can purchase ads at prices ranging from U\$1.00 per 1000 clicks and up... some times you can get them even cheaper if you know where to look.

Here are a few screenshots to show you how much I've made since I started with this method:

[Adult Friend Finder](#) Daily Traffic Stats:

- You can see that I've been an affiliate with them since 2006, and you can see that I only started making some real money with them back November 20, 2009 (See the yellow highlighted dates).
- You can see that the **Earning Per Unique** click vary, but in the end they average out to about 0.5 Cents per Unique click, which comes out to \$5.00 per 1000 Unique clicks. (See the green highlighted column).

[Adult Friend Finder](#) Monthly Traffic Stats:

- As you can see from the screenshots, I didn't make any real money with [AFF](#) until November of this year.
- Notice how the earnings have been growing from just \$123 in November to \$266 in December, and that is without taking into consideration the fact that I have another payment for December coming in for \$159 (See screenshot)

[AFF Payment Proofs](#)

Here you can see the details for the three payments that I have received so far since November 09.

- 11-16-2009 -> \$53.29 -> These earnings are whatever small amounts I had collected since 2006 and about \$40 in earnings from October 20th to November 16th. Not too much money, but I had just started with this method.
- 12-01-2009 -> \$92.67 -> This is what I earned from 11-16-09 through 12-01-09. That is \$93 in 15 days which averages out to just over \$6.00 per day.
- 12-16-2009 -> \$118.77 -> This is what I earned from 12-01-09 through 12-16-09. That is \$119 in 15 days which averages out to \$7.92 per day. You see my earnings per day have grown almost \$2.00 in less than 2 weeks.
- 12-31-2009 (**Unpaid**) -> About \$160.00 (See the attached screenshot for unpaid balance). That would be \$160 in 15 days which averages out to \$10.67 per day. Again, my earnings per day have grown almost \$3 in less than 2 weeks.

And here are the payments that I have received...

How to find cheap **Juicy Ads**:

- Log In to your **JuicyAds** account
- Click on the **Buy Ads** section on the navigation menu at the top.
- Find the *Cost per Click (CPC) between* area on the left sidebar.

See Screenshot for where to find this area...

- Enter values of 0.001 for both fields there. This will limit your search to only sites that have ad spaces with those prices.
- Hit the **SEARCH** button
- Once the search has completed, you can sort the results by Impressions, Clicks, Price or Alexa Rank.
You can also narrow the search parameters by Categories, Website Types and Ad Sizes (Just see the sidebar on the left for all the options).
- Once you've found the sites that you would like to buy ads from **YES, you will have to spend some money here... nothing in life is free...** Check to see that they have available ad spaces (Some times websites have sold all their ad space, so you won't be able to buy at that moment).

Here is an example of what you're looking for in an ad space:

See the highlighted section... **CPC**.

You'll notice that it shows **estimated CPC :\$< 0.001**

Here is how you figure that out:

1. Take the Average Ad Clicks -> 1792 Clicks per day.
2. Multiply that by 30 days -> $1792 \times 30 = 53760$ Clicks per month
3. Divide the price of buying that ad space for a month by the number of clicks per month -> $\$42 / 53760 = 0.000781$
4. Multiply that number by 1000 -> $0.000781 \times 1000 = \$0.78$.

That means you would be paying less than \$1 per 1000 Clicks with this ad spot, and if you used that ad space to promote your [Adult Friend Finder](#) PPC Campaign, you would be making \$5 per 1000 Unique clicks with them. So you can see there is a good margin of profit in this.

Things to remember:

- Know that you will have to spend money to make money... There is no such a thing as a **FREE RIDE** in life!
- Make sure you do your research before you buy advertising. Watch the website you're interested in for a few days before purchasing the ads and make sure that the stats you're looking at are normal and not an exception.
- Don't put all your eggs in one basket. I can't stress this one enough people. Diversify. Try to find a number of sites where you can buy ad spaces on a regular basis and keep track of your earnings vs. spendings... that way you'll know if you're really making money, or if you're just fooling yourself.
Without going into too much detail... I can tell you that since 10/22/2009 I've spent \$200 in advertising over at [Juicy Ads](#), and if you look at the screenshots on the previous posts, you can see that I've earned a total of \$423 with [Adult Friend Finder](#). So since I started with this method, I've made a profit of \$223.
Not bad for a few minutes of work every two weeks.
- Be prepared for bad ad spots to happen. This happened to me. I found a website using the method outlined above and bought an ad space for 2 weeks. According to my calculations, the ad spot should have been costing me about 0.002 per click... but for some reason (maybe the holiday season slowed things down) I am not getting as many clicks as I had calculated and the **Cost Per Click** on that ad spot has gone up to over \$0.010 per Click. That's 5 times more than I thought it would be and I ended up losing some money on this ad spot. The good thing is that I had a number of other ad spots producing good clicks at \$0.001 and less so that made up for the loss and I still made \$160 in the last 2 weeks.

OK... I hope this helps some of you earn some nice cash with [Adult Friend Finder](#) and [Juicy Ads](#)

Note: the best way to say thanks to me is not to donate, you can say thanks by Sign Up at [Adult Friend Finder](#) and [Juicy Ads](#) with my referral link, I will earn 5% of your earnings and you will not lose anything ☺ . Fair right?
